Summary

I have been working many different types of jobs since I was 16 which include multiple sport referee positions, food service, customer relations, and constructions.

I am currently going through the Rutgers Coding Bootcamp in order to become a front and back-end web developer.

I am working on many current projects but the ones I would like to show are are my portfolio using HTML and CSS <https://bppearsall.github.io/portfolio-Pro/>

A random password generator homework from Rutgers using HTML, CSS, and Javascript <https://bppearsall.github.io/Random-Password-Generator/>

And finally a new website called WatchNext which uses API information to retrieve a list of popular movies that are available to watch using HTML, CSS, Javascript, and Foundation CSS Framework along with IMDB and Youtube APIs <https://bppearsall.github.io/watch-Next/>

Experience
